

DW Dunn Environmental Policy

DW Dunn Ltd is a third generation Plumbing and Heating Engineer provider. The local business, based in Ewen, Cirencester, caters for the Cotswolds, and northern Wiltshire, supplying customers with all their plumbing and heating needs.

DW Dunn Ltd will ensure that its activities are carried out in accordance with best environmental working practice as set put by all relevant UK, EC, and international regulations and legislation. The company will develop, demonstrate, promote, and monitor use of best practice, techniques and management throughout its activities.

Responsibilities

DW Dunn Ltd recognises that due to the nature of our business, our operations and products have an impact on the environment. We are fully committed to the improvement of our practices and are committed to continuous improvements in environmental performances.

The environmental policy depends on the managers, supervisors and employees at all levels within the company. The employees will be made aware of what is expected of them by the company and what is required by them by law.

All employees have a responsibility to accept their personal involvement in the practical allocation of this policy, but specific responsibility falls upon line managers, supervisors, and staff professionally involved in administration and training.

The site supervisors are responsible for the day to day environmental issues arising on site and for the implementation of necessary measures to ensure compliance with all statutes and other matters relating to the environment. They shall identify, during the progress of works, any matters that breach the statutes. They are also responsible sub-contractors employed by the company on site, to ensure they comply with environmentally friendly practices.

Objectives

Where possible/practical DW Dunn Ltd will endeavour to: -

Waste: We will seek to reduce our environmental impact by continuing to improve the process for control of all materials used on appointments, and in administration. We will minimise our wastage control, and manage it through efficient engineering, and professional judgement.

We commit to recycling and reusing as much as and where we can; including cardboard, plastic, paper, copper, brass, batteries, and ink cartridges. We will continuously seek to improve our recycling facilities and procedures in both engineering and administration.

Pollution: We will reduce our pollution levels, both noise and air pollution, and tackle any issues which impact the surrounding area, including residential neighbors and wildlife.

Purchasing: We will develop relationships with suppliers to ensure that they are adhering to best environmental practices where possible.

Fleet Cars: We are seeking to upgrade company vehicles so that they are EuroIV compliant, therefore cleaner for the environment.

Energy: We will continuously monitor the use of energy in both administrative and engineering processes to reduce wastage.

Awareness/Training: All employees will be made aware of their environmental responsibilities and commitment to improving environmental practice.

DW Dunn Ltd are aware of the requirements of the Wildlife and Countryside Act 1981 and the Protection of Badgers Act, especially with regard to animals which are protected, and in particular birds, bats and crested newts.

Access will be given to any specialist environmental consultants and any specialist named by a client.
